

STAFF HEALTH

Consultations

The School Nurse is available to all school personnel for medical consultations regarding their own health and the health of their students.

Tuberculin Testing

All School employees will be tested for tuberculosis as required by the State Department of Human Services. Those who show a positive reaction will be further evaluated and referred for treatment as necessary. X-ray examination of the chest is necessary for known positive reactors.

Influenza Clinic

All school employees will be offered flu vaccine annually during November. The reduced fee will be set by the physician administering the vaccine.

Hypertension Screening

Blood pressure readings will be done for any school employee upon request.

First Aid Training

As provided for in the Master Contract between the Windham Educators Association and the Windham School Committee.
