

**SUPPORT STAFF**

The School Committee recognizes that good work done by secretaries, clerks, cafeteria and maintenance workers, technicians, aides, bus drivers, and other support staff members contributes greatly to the smooth and effective operation of this school district. The School Committee seeks to attract and keep concerned and capable men and women to carry on support services assignments.

The School Committee desires that the relationship between the instructional and support services staff be that of partners working together for better schools.

The School Committee will strive, within budgetary limits, to provide a working environment for all support staff that will contribute to efficient job performance, will advance pride in, and offer rewards for work well done.
