

## **STAFF JOB ACTIONS**

It is the intent of the School Committee to ensure that district educational programs function without interruption. For this reason it will seek to ensure that contracts which are in force with the district are fulfilled. As much or as little legal recourse will be entered into as is necessary for the School Committee to fulfill its obligations and responsibilities to district citizens.

Any employee who conducts himself/herself in a manner which is disruptive to district educational programs and/or violates the provisions of his/her contract with the district subjects himself/herself willfully to the possibility of legal action by the School Committee. An employee who breeches his/her individual contract has, in essence, terminated his/her employment with the district.

It is the responsibility of every administrator to ensure that the obligations and responsibilities of the School Committee are fulfilled as the School Committee directs.

Adopted: 1988
