

January 15, 2010

Dear Parents,

On Thursday, January 21, 2010, researchers will be in the Windham High School cafeteria during breakfast and lunch periods collecting data. They will be collecting information about the foods and beverages that students choose as part of a research study. Researchers are only observing and recording student selections and no personal or identifying information about students will be collected. Students may be asked to describe the item(s) that they choose for the sake of accurately recording that item. Students may elect to not have the item(s) they choose be recorded and the researchers will honor that request. Should you have any questions regarding this information, please contact Stephanie M. Joyce, MS, RD, School Health Coordinator, at (207) 892-1800 ext. 2029.

Thank you
